

GATLING

EXPLORATION

Rapidly Advancing High-Grade Gold Project in the Abitibi Greenstone Belt

Gatling owns the advanced, high-grade Larder gold project in Ontario, Canada. Larder sits on the Cadillac-Larder fault, in the heart of the Abitibi greenstone belt, just 35km east of Kirkland Lake. The project boasts a sizable historical resource of just over 960k ozs of gold at 5.5 g/t. In the last twelve months, Gatling proved that all three deposits at Larder are part of a single mineralized system stretching for over 4.5km. The mineralized footprint has been expanded in every direction and the company is now sitting on 140km of successful drill results outside of the historical estimate. Gatling is now focused on near surface drill targets as well as potential at depth and is rolling out a 25km drill program during H1/21. The company is well-financed to deliver on a catalyst rich 2021, including a resource update in the second half of the year.

THE ABITIBI GREENSTONE BELT

The Abitibi Gold Belt has been a world-class gold mining region for decades, producing over 170 million ounces of gold.

LARDER GOLD PROJECT

-  Deposit
-  Project
-  Larder Gold Project Area

The Larder Property hosts the Bear, Cheminis and Fernland gold deposits that extend along 10km of the Cadillac-Larder break between Kirkland Lake and Virginiatown. And, 7km west of the Kerr Addison Mine, which produced 11 million ounces of gold.

2011 TOTAL RESOURCE ESTIMATE@ 2.5 G/T AU CUT-OFF UTILIZING GOLD*

Classification	Tonnes	Grade (Au g/t)	Contained oz Au
Indicated	335,000	4.07	43,800
Inferred	5,141,000	5.55	917,000

Disclosure of Historical Estimates*: The Larder Lake Project contains a historical resource estimate with an effective date of June 15, 2011 (report dated August 15, 2011) by P&E Mining Consultants Inc. titled "43-101 Technical Report and Updated Resource Estimates on the Larder Lake Property, Larder Lake, Ontario for Bear Lake Gold Ltd." Gatling considers this resource estimate to be historical; it has not independently verified it, and therefore it should not be considered a current resource. A qualified person has not done sufficient work to classify the historical estimate as current mineral resources or mineral reserves, and Gatling is not treating the historical estimate as current mineral resources.
